

ABDULLA TAMIMI

Junior Software Engineer | Full-Stack & AI Solutions Engineer

Khalda, Amman, 11953 · +962 79 963 4207 · tamimiabdulla418@gmail.com · [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate, funded tech founder, and AI Solutions Engineer Fellow at 9XAI/HTUx, with hands-on experience in software engineering, full-stack development, and AI-driven systems. Founder of LeafleX, a health-tech startup backed by 15,000 JOD from Zain Al Mubadara (ZINC), focused on digital medicine leaflets and healthcare track-and-trace solutions. Completed a Java development internship at Estarta Solutions, applying object-oriented programming and data structures in enterprise environments. Experienced in building scalable applications using React.js, Node.js, PostgreSQL, and Python, and developing machine learning models using XGBoost and Random Forest. Passionate about building intelligent systems that drive real-world impact.

WORK EXPERIENCE

AI Solutions Engineer Fellow — 9XAI / HTUx — Amman Feb 2026 – Oct 2026

- Contributed as a fellowship engineer across multiple national-scale digital platforms spanning citizen-experience analytics, crisis-management simulation, and government content systems.
- Served as Data KPI Lead on a citizen-experience analytics platform, building data pipelines and multi-metric measurement systems, and leading stabilization work across major release phases.
- Worked as a developer on a crisis-management and simulation platform, building analytical backend services.
- Presented an Arabic government content platform directly to a senior government official.
- Contributed to a Moodle-based learning content management system as part of a cross-functional development team.

Founder & Technical Lead — LeafleX — Amman Nov 2024 – Present

- Founded and leading LeafleX, a funded health-tech startup focused on digital medicine leaflets and healthcare track-and-trace solutions.
- Secured 15,000 JOD in startup funding from Zain Al Mubadara (ZINC) to develop and validate the product.
- Designed and implemented an HL7 FHIR XML generation system for structured pharmaceutical data.
- Architected backend logic and system workflows for healthcare interoperability and regulatory alignment.
- Expanding company scope toward broader IT and digital transformation solutions.
- Lead product strategy, technical development, and stakeholder engagement.

AI Systems Developer — Tammy AI (Personal AI Framework Project) — Amman Sep 2025 – Present

- Designed and developed Tammy, an AI-powered clarity and decision-support assistant.
- Built full-stack architecture using React, Node.js, and Python-based AI components.
- Integrated large language model logic with structured prompt frameworks.
- Applied Agile methodology for iterative development and system refinement.
- Designed modular system architecture for scalability and future expansion.

Website: tammy-ai.com

Java Developer Intern — Estarta — Amman Jun 2023 – Sep 2023

- Applied object-oriented programming principles and data structures in Java to develop and optimize backend components.
- Contributed to writing clean, maintainable, and modular code following industry best practices.
- Assisted in debugging, testing, and improving performance of enterprise-level applications.

PROJECTS

Academic Research Project, HTU — Machine Learning Developer — Amman Mar 2025 – Jun 2026

- Built and evaluated machine learning models including XGBoost, CatBoost, Random Forest, and Deep Learning.
- Performed data preprocessing, feature engineering, and model optimization using Python.
- Analyzed a Telco dataset and primary survey data to improve churn prediction accuracy.
- Presented findings in a formal academic defense discussion.

HTUFoundIt (Academic Project) — Full-Stack Developer — Amman Jun 2025

- Developed a full-stack web application using React.js, Node.js, and PostgreSQL.
- Designed and implemented RESTful APIs for reporting and tracking lost items.
- Structured backend architecture for scalability and maintainability.

Repos: [Frontend](#) · [Backend](#)

TrashToCash — System Developer — Amman Feb 2024 – Aug 2024

- Co-developed an entrepreneurial solution addressing e-waste management challenges.
- Designed a system concept connecting waste collection with monetization strategies.

- Contributed to technical and business model development.

AAA — Aqaba Aqua AI — *Hackathon Project* Jul 2026

- Marine intelligence platform forecasting flash-flood sediment risk to coral reefs in the Gulf of Aqaba.
- Led a multi-person team and built the frontend and backend end-to-end; presented under the 9XAI program at the Blue Ocean Hackathon.

Repo: [GitHub](#)

Terhal — *Ma'an Hackathon Project* Aug 2026

- Tourism trip-planning and verified local advisor platform covering tourism sites across Ma'an governorate.
- Contributed to the design and development of the platform as part of a hackathon team.

EDUCATION

Bachelor of Science in Computer Science — *Al Hussein Technical University (HTU)* Sep 2022 – Jan 2026

- Includes an embedded Pearson BTEC Diploma in Computer Science (2022 – 2024), awarded upon completion of the diploma-track coursework within the bachelor's program.
- Coursework: Data Structures & Algorithms, Database Systems, Artificial Intelligence, Software Engineering, Operating Systems.
- Conducted research on AI-based customer churn prediction using XGBoost, Random Forest, and CatBoost.

SKILLS

Python (Intermediate) · React (Advanced) · JavaScript (Advanced) · Java (Intermediate) · SQL (Advanced) · PostgreSQL (Advanced) · Auth0 (Advanced) · Git (Intermediate) · GitHub (Advanced) · C (Expert) · Prompt Engineering (1 year)

COURSES

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents — Ligency / Ed Donner
- MERN: React, NodeJS, Express & MongoDB in Arabic — Yahya ElAraby
- Complete Web & Mobile Designer: UI/UX, Figma, +more — ZTM (Zero To Mastery) / Andrei Neagoie
- Unreal Engine 5: All-in-One UE5 Master Blueprint — Unreal Magic

LANGUAGES

Arabic (Native) · English (B2 – Upper Intermediate) · Turkish (B1 – Intermediate)
